

**Grade :** R64

Product Name: Rubber Protective Wax ( Anti Ozone Wax )

Appearance : White to yellowish Pastille

Application: R64 is suitable for natural / synthetic rubber formulations in manufacturing rubber articles. The useful life of the rubber product becomes larger since keep out of the influence of the ozone, the sunlight and the weather. When the rubber product have new surface due to damage the wax in the sizing may continue to move onto the surface, then it forms a layer of new protecting film. unsaturated rubber parts under static conditions such as storage, preventing the appearance of cracks and ageing in the final product.

Packing: 20Kg PP Bag on pallet

Storage: Dry Storage under 30°C is recommended.

## Typical values

Properties	Unit	Test Method	Value
Melting Point	°C	DSC	62~68
Kinematic Viscosity (100°C)	Cst	ASTM D445	4~6
Needle Penetration(25°C)	dmm	ASTM D1321	12~16
